

# Crucial® Memory for Mac® Systems

## Compatible with Mac® Systems\*

Take the guesswork out of upgrading your Mac with Crucial® memory for Mac systems. Since Apple® computers often have very specific memory requirements, including particular component densities, speeds, and SPD programming specifications, it's important to use memory that's engineered for your Mac. With more than a decade of experience manufacturing and developing memory for all types of Apple computers, Crucial makes adding memory the easiest way to upgrade your Mac.

Improve  
responsiveness

Run apps faster

Multitask with ease

Compatible with more  
than 70 Mac system  
models

Limited lifetime warranty valid everywhere except Germany, where warranty is valid for 10 years from date of purchase.

\*3.0MHz and 3.4MHz systems with the Intel® Core i5 processors only support modules up to 8GB. Note that per Apple manufacturer specifications, memory can't be upgraded on (a) many Mac systems made after mid-2012 and (b) retina-based models. Before upgrading your memory, consult your owner's manual to verify that an upgrade is possible.
